About

Full Stack Developer and AI/ML enthusiast with strong expertise in Python, React, OpenCV, and deep learning. Experienced in building production-ready web applications, AI pipelines, and research-driven solutions. Skilled in data preprocessing, model training, automation, and cloud-based deployment. Passionate about leveraging technology to solve real-world problems efficiently.

Internships

Salesforce Developer Intern *May 2025 – Jul 2025*

During my internship, I gained hands-on experience working with Salesforce CRM, where I explored how real-world business processes are managed on the platform. I learned and practiced Apex programming and built user interfaces using Lightning Web Components (LWC). I also worked on implementing basic automation by writing Apex triggers and using SOQL queries to handle business logic and data operations efficiently.

Web Development Intern – SRM AP *Jul 2024 – Apr 2025*

I developed a full-stack stationery platform that digitized the campus printing process, helping students place orders online and significantly reducing waiting time. To make pricing accurate and efficient, I built a Python-based automated page counter that instantly calculated document pages and costs, minimizing manual errors. I also integrated the Razorpay payment gateway and designed a real-time admin dashboard, enabling smooth payment processing, order tracking, and status updates.

Projects

Resume Screening System Live Demo | Git Repository

Python, NLP, spaCY, TF-IDF, Streamlit, Machine Learning

Developed an NLP-based resume screening system to rank candidates against job descriptions using multi-factor scoring and semantic similarity. Implemented entity extraction for skills, degrees, experience, and job titles using custom spaCy NER, PhraseMatcher, and regex techniques. Built an explainable ranking interface with Streamlit supporting PDF/DOCX parsing, candidate explanations, and CSV/PDF export.

SRMAP Stationery Hub Live Demo | Git Repository

Node.js, Thress.js, MongoDB, Tailwind CSS

Designed and developed a comprehensive web-based platform to digitize and streamline the university stationery shop's printing workflow, reducing student wait times and optimizing order management.

Developed an automated document analysis service in Python to instantly calculate page counts and pricing, eliminating manual errors and streamlining the checkout process.

Integrated Razorpay API for secure, multi-method digital payments and implemented a real-time admin dashboard for seamless order tracking and status updates.

LocalLens - Smart Business Discovery Git Repository

Python, Flask, Google Places API, Google Sheets API, HTML, Jinja2, REST APIs, CSV Handling

Developed a Flask-based business search web app that integrates Google Places API, previews results in-browser, and supports CSV export and Google Sheets automation.

Education

2023 - 2027 Bachelor's Degree, SRM-AP University (CGPA: 7.99/10)
2022 Class 12, SSC Board (GPA: 8.5/10)
2021 Class 10, SSC Board (GPA: 10/10)

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, Java, HTML/CSS, SQL, PHP
Frameworks: React.js, Flask, Bootstrap, MongoDB
Developer Tools: Git, VS Code, Google Colab, Jupyter Notebook, Docker, Google Antigravity
Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, TensorFlow, OpenCV, MediaPipe, cvzone, Requests.

Certifications

Coursera: Supervised Machine Learning, Advanced Learning Algorithms, Unsupervised Learning, Recommenders, Reinforcement Learning.
Oracle: Java SE 17 fundamentals, OOP, Java Collections, Java Stream API, Java Concurrency.
MongoDB: 2026 MongoDB Associate Developer
